

Message from the editor

Thank you for downloading the Journal of Emerging Trends in Computing and Information Sciences first issue. The main objective of the journal is to publish refereed papers in the area Computing and Information Sciences. It is a quarterly published online international scientific research journal focusing on issues in active research. This issue contains seven research papers selected after peer review. It reflects the quality and style of the journal's content in the future.

Our ambition is to publish work that is truly valuable to both authors and readers. The secondary objective is to assist in the evolving and maturing of IT-dependent organizations, as well as individuals, in information and knowledge based culture and commerce which includes but is not limited to Information Systems, Artificial Intelligence, e-Commerce, Virtual Business and Enterprise, Intelligent Systems, Computer Systems, Information Technology, Computer Networks, e-Government, Database Systems and Theory, Language and Search Engine Design, Knowledge Management, Data Mining/ Web Mining, Computational Intelligence, Distributed Computing, Scientific and High Performance Computing etc.

Looking forward to welcoming you as a regular reader.
